On tour with Llamas

A panoramic walk from Innerberg to Brunnhaus

Alfred Stock

With the llamas Sam, Sanchez and Amadeus, Ingo and Ferdl at our side, we walk on sunny slopes to the viewing point in Brunnhaus above Finkenbergl. From there we will have wonderful views of the Penken, the two Nature Park communities of Finkenbergl and Mayrhofen and the surrounding Zillertal Mountains. The return journey takes us via Persaleben back to Innerberg. Escape from the hectic of everyday life and let yourself be infected by the placidity of the animals. An excursion with the five „South Americans“ is bound to be an unforgettable holiday experience for young and old!

Rock Crystal, Granite and More...

In search of precious Zillertal crystal

Hermann Muigg

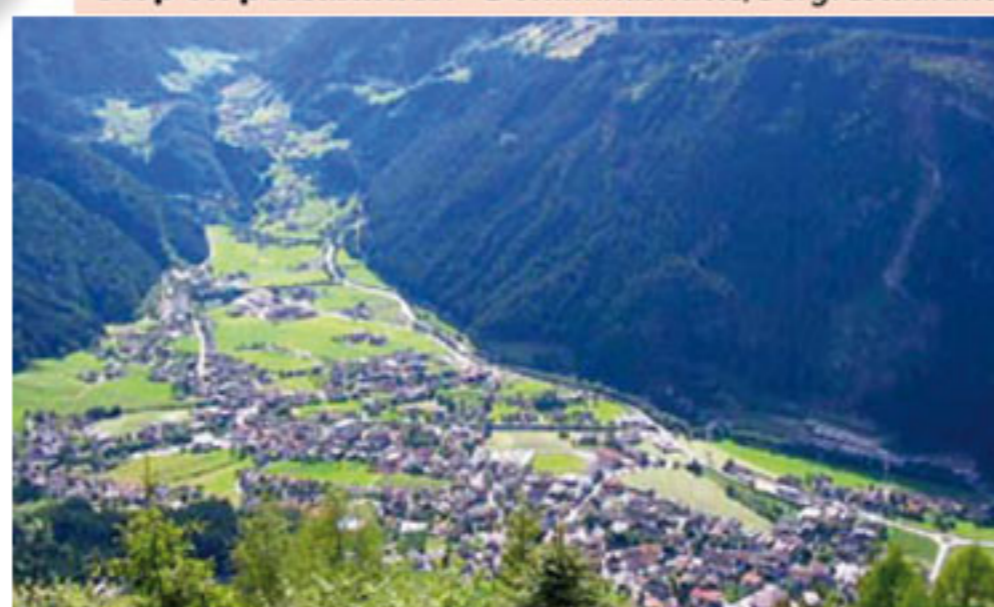

From the Schlegeis Reservoir with its impressive views of the glaciers in the „Schlegeisgrund“, we enjoy an unhurried walk on what was once a smugglers' track towards Pfitscher Joch, a mountain pass to South Tyrol. We continue along a little used steep track into the unspoilt Haufen Valley, where, most notably, granite, rock crystal and blue cyanite can be found. The hike is worth it just for the views of the imposing hanging glaciers of the Hochferner. During the walk in this unspoilt side valley you'll get interesting background information about the geology and abundance of minerals in the Zillertal Alps. You'll also be able to find a few crystals as souvenirs during the tour!
